Preface

This study guide is based on the study guide prepared by Profs. Edwin Dolan and David Lindsey for the earlier edition of the book, “Understanding Macroeconomics”. While we have kept the same zeal for this edition, a thorough revision is carried out to make sure that all questions make sense and the study guide is consistent with “Understanding Macroeconomics”, Kulkarni, and Dolan, Horizon Textbook Publishing, Enhanced Second Edition, 2005, book. In this project I incurred debt to Mr. Siddharth Swaroop who spent several hours in revising material.

Attempt is made to construct as many relevant questions for each chapter as possible. Students would find that after reading and working through each chapter, they are comfortably ready to take (those confusing?) tests in main class. Hopefully this will improve students’ understanding as well as grade in Macroeconomics class. My only expectation is that due to this introductory material, more students are influenced to be economics and business majors. Please let me know at [**kulkarnk@mscd.edu**](mailto:kulkarnk@mscd.edu) if you have any suggestions for improvements in this study guide.
